

**DR. MAYTAL SAAR-TSECHANSKY** is an assistant professor in the Department of Management Science and Information Systems. She received her Ph.D. from New York University in 2002 and obtained her B.S and M.S in Industrial Engineering from Ben Gurion University, Israel. Dr. Saar-Tsechansky has consulted organizations on data mining systems and executive information systems. She joined The University of Texas in 2002 and is teaching courses in data mining for decision support. Her research focuses on the development and improvement of methods from machine learning and data mining for extracting intelligence from data. Her recent research addresses the incorporation of cost and benefit factors into predictive modeling methodologies.
