Course Website

UT's Blackboard System at <http://courses.utexas.edu/> will be used for all course material. You should be able to find everything for this course within Blackboard including the syllabus, assignments, class slides, grades, and more.

Turning in work

We will use Blackboard's Assignment Manager for turning in the first VB.Net assignment. Assignments may NOT be e-mailed to either your instructor or the teaching assistant, as they will NOT be accepted via e-mail. You MUST use the proper naming convention for your files or 10 points will be deducted. Your zipped file MUST be named LastName_FirstName_Assignment#. An example of this is Smith_Mary_VB1.zip. ASP.Net assignments will be graded directly via a URL that will be specified in the individual assignments.

ASP.NET assignments do NOT have to be turned in, as the instructor, TAs, and graders will use internet explorer to run and grade your homeworks. We will check the date stamp on the files to determine the date and time of completion, so be CAREFUL not to open or run your ASP projects after you turn them in and BEFORE the grader has time to grade them. If you develop your project on your local computer, be sure and install it on classweb2 and test that it works properly. Your websites MUST be stored in the MIS333K folder on the class server (Classweb2).

Late Points

Assignments are due at the start of the class period. Any work turned in after class begins will be considered late. If you finish the assignment after class on the day it is due, you lose 25 points. No work will be accepted after midnight on the day the assignment is due. Due dates will not be adjusted due to technical problems or server issues. It is your responsibility to start the assignment early enough to allow for additional time should problems outside of your control arise.

MIS333K System Project Team Awards

The MIS 333K Team System Project also includes cash awards for the top two teams. Teams will be judged by the instructor, who has the final say in the team standings. The first place team will receive \$500 per team member, and the second place team will receive \$250 per team member.

System Project Teams

The system project teams are made up of 4 class members. If you fail to keep up with your teammates, you will be kicked off the team, and you will have to do the entire system project by yourself.

Exams

Exams are scheduled well in advance. There are NO makeup exams. If you miss an exam, you will be given a zero, period! If you are ill, or have some other legitimate reason for missing an exam, you must contact the instructor by e-mail or phone BEFORE the time the exam starts. All exams will be held in the Mod Labs.

Topic Outlines

The semester will be divided into three sections, and an exam will be given at the end of each unit. Topic outlines for each third will be available at the end of the syllabus.

VPN connection

In order to access your SQL server database and ClassWeb2 web publishing space on the McCombs servers, you will need to set up a UT VPN (Virtual Private Network) connection on your home computer. You can download the Cisco VPN client from: <https://vpn.utexas.edu/>
