

SUPPLY CHAIN MANAGEMENT CENTER

The Supply Chain Management Center (SCMC) exists to enhance the interaction of industry, students, and faculty resulting in world-class supply chain education, leaders, solutions, and research. The department educates students to enable thought leading discussions on emerging supply chain technologies and practices, encourage industry related supply chain knowledge and research, facilitate the development of outstanding programs, enable real-world problem solving for our industry partners, and encourage the development of future industry and academic leaders.
