

**Casey Andrews**  
**Manager**  
**Capture Services, Amazon Web Services**  
**Round Rock, TX**

Casey Andrews has a unique background in Military Intelligence, Computer Science and Graphic Arts. She currently leads Capture for California and Texas as part of the World Wide Public Sector, State and Local Team for Amazon Web Services (AWS). As a Capture Manager, Casey leverages her knowledge of technology and public sector procurement

strategy to help customers solve complex problems, remove barriers, and obtain access to innovative solutions they need.

After serving on active duty in the United States Marine Corps, Casey was able to help several technology start-ups grow to reach key milestones such as acquisition and IPO. She then joined Dell, Inc. in Round Rock, Texas where she developed and scaled the Public and Commercial Services Program Management teams and helped to build out the first program management office for the Data Center Solutions team.

Prior to joining AWS, Casey served as the Chief-of-Staff to the CTO at Rackspace in San Antonio, Texas where she played a key role in defining and establishing a differentiating development and retention programs that led to a strong technical culture. During her career, Casey has led large technical teams and well known as a builder and problem solver and has effectively established and expanded many new teams into high performing departments charged to innovate new capabilities as the cloud industry has evolved.

Casey holds an MBA from the McCombs School of Business at the University of Texas at Austin, Bachelor in Science in Management Computer Information Systems (MCIS) from Park University and Associate of Arts in Web Design and Development from Saddleback College, Irvine California. Casey enjoys competing in adventure races and mentoring young professionals. Casey and her husband, David have seven children.
