Navigating the Job Search Process

THE OVERVIEW
**Selection Process**
- the process employers use to choose candidates (who have relevant qualifications which match the job requirements and fit into the culture of the organization) to fill existing or projected job openings.

**Job Search Process**
- a systematic process used by potential employees to source and apply for existing and future employment opportunities.
GOAL = TO MAXIMIZE THE PROBABILITY OF FINDING & SECURING THE PERFECT POSITION WITHIN A LIMITED PERIOD OF TIME.

STRATEGY = TO UTILIZE VARIOUS JOB SEARCH METHODS & TACTICS SIMULTANEOUSLY; WHICH SHOULD IMPROVE THE ODDS OF SUCCESS.
THE FORMULA FOR A SUCCESSFUL JOB SEARCH

Perspective + Action = Success

- A systematic job search process requires planning, patience, commitment, and persistence.
- Searching for a job is a job.
- Spend a minimum of three hours per day conducting an active job search.
THE FISHERMAN

- Chooses the best bait for the environment and circumstances
- Casts a wide net, throws out many lines at once, and sets traps in various locations
- Keeps moving around to different locations—especially if getting no bites
- Only keeps the ‘big ones’

THE HUNTER

- Chooses one location, one type of bait, and one weapon
- Hunts for only one type of prey at a time
- Hides, sits silent and still, and waits for the prey to come to them
- Shoots at everything they are able to see within a limited area / distance
SOURCES OF JOBS

- **Networking** = 80%
- **Other** = 20%
  - Mail & Phone
  - In-Person Visits
  - Online Methods
  - Employment Agencies
  - Internships / Volunteering
NETWORKING

- 80% of jobs are found utilizing a professional network of colleagues, friends, and family

- Candidates should regularly ask their contacts, “Who do you know who may have a job opportunity for me?”

- Candidates should tell everyone they know that they are currently searching for a specific position in a chosen industry and be able to concisely explain their skills, knowledge, experience, and area of expertise to network contacts.
Fifty-four percent of recruiters report that candidate image, demeanor, and fit are factors which account for 50% of their hiring decisions.

What you look like, how you speak, and how you present yourself is just as important as the content of the words that you speak or write.
Image Does Matter to Employers!

Employers, Interviewers, and Recruiters make instantaneous judgments about candidates within five to thirty seconds based solely on the candidates’ image and demeanor.

- Creating an appropriate image involves crafting a professional package
  - Digital Image
  - In-person Image
83% of executive recruiters polled admitted to using the internet to investigate a candidate’s background and history.

Employers believe that past behavior is predictive of future behavior.
TYPES of PRE-EMPLOYMENT SCREENING

- Criminal Background Investigation
- Driving Record Investigation
- Credit History Investigation
- Electronic Internet Image & Profiles
- Past Employment / Employer References
- Military Service History
- Educational / Training Records Investigation
- Drug / Alcohol / Tobacco Screens
- Physical / Emotional / Personality Examinations

A conviction will not necessarily bar a candidate from employment—with two exceptions:

1. A Conviction related to a violent crime i.e. Murder, Assault, & Rape
2. A conviction which is substantially or reasonably related to the functions or qualifications of the position for which they are applying

- Describe fully the conviction including the nature, dates, and rehabilitation since then
- Any omissions, misrepresentations, or false information provided on the employment application may result in the rejection of the application, future discipline, or termination (if already hired) and automatically disqualifies the candidate for unemployment benefits!!!
