The MBA/Master of Arts in Energy and Earth Resources dual degree combines advanced studies of management with the studies of geosciences and natural resources. It teaches students to apply business policy and science knowledge to energy issues in the private industry, government and nonprofit sectors.

Students can earn both degrees simultaneously in approximately three academic years. Degrees are awarded when the required coursework in both areas is completed.

**Degree Requirements**

Students must complete a minimum of 77 credit hours of coursework including:

- 23 hours of MBA core courses
- 24 hours of MBA elective courses
- 30 hours of work in Energy and Earth Resources, including a 6-hour thesis based on original research

The dual degree code for this program is **635085** and should be referred to when applying to the program. Please note that a minimum of two years of full-time work experience is required for admission to the Texas MBA Program.
